Khun Pongsak,

How will you varnish the wooden floors?

I think it is better to varnish the wood on all sides before the wood is put on the floor.

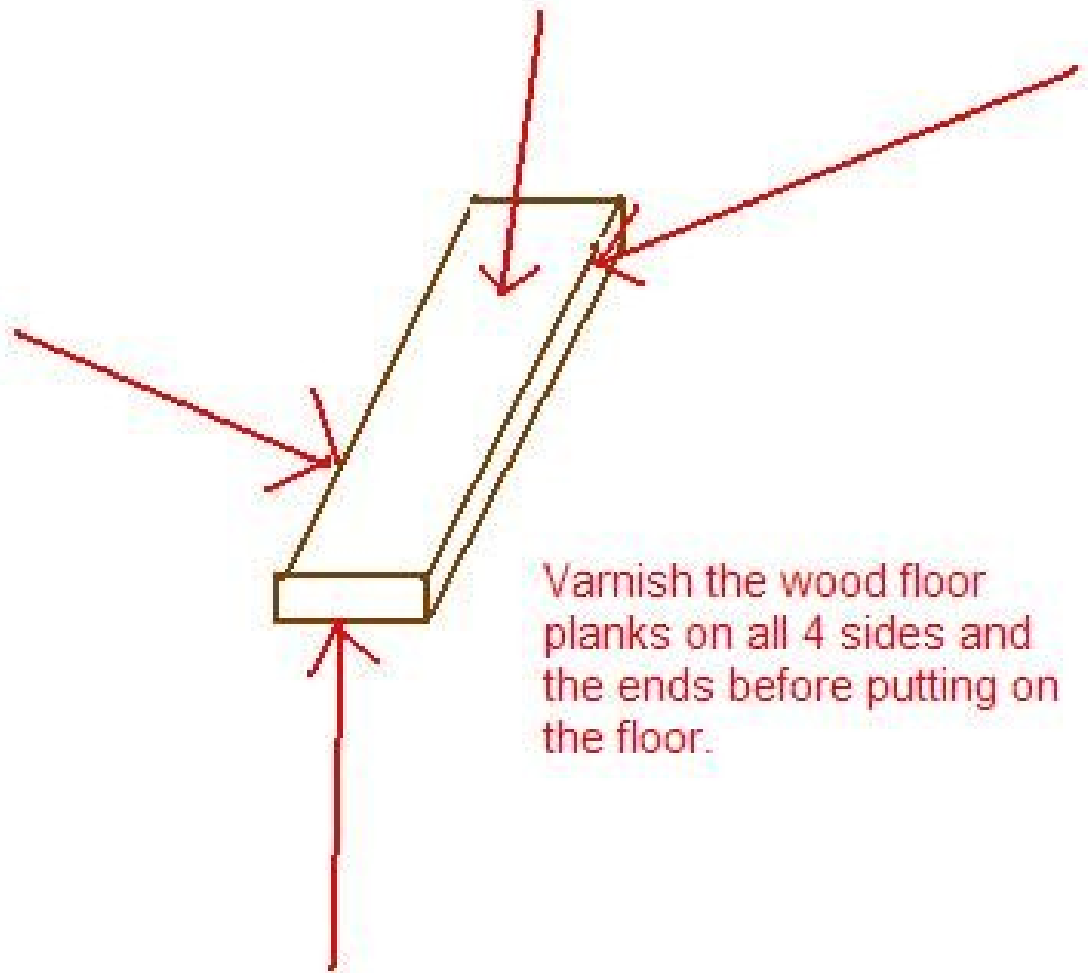

This is very important for the balcony to protect the wood on all sides against the rain.

How many coats of varnish will there be? I think when we were at The Mansion in January you said 5 coats?

Please let me know.

Second Floor Floorboards

Thank you and

Best Regards

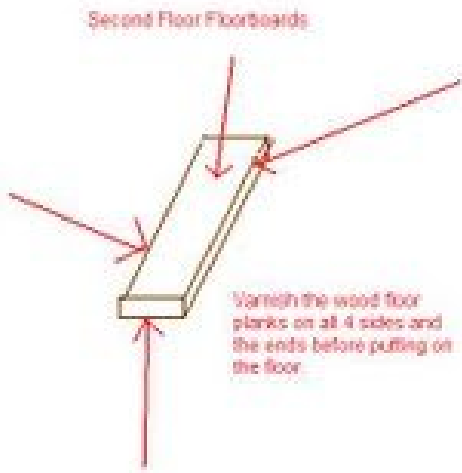

Alan Brown
